Thread: Discussion [3D printed parts, hopefully useful for F5J!](#)

May 08, 2019

#68

tom43004

Found it. Curved or straight. I think it was a 3.5-4mm round hole for the base.
Just measure it when printed then drill and epoxy in place.

Since the top is narrow, it's best printed with a nozzle .4mm at the largest. I
printed these with PETG and supports are absolutely necessary.
